

Does my student need any previous experience before taking this class?

No, absolutely not! The course starts off very basic and builds in complexity throughout each semester. It was specifically designed to provide a strong foundation for students with no prior knowledge or experience, and our instructors are dedicated to guiding every student.

If my student attends this course, should they go to college or straight to the workforce?

Upon completing this course, your student will have valuable skills applicable to both college and the workforce. While they can certainly enter the workforce directly, we highly recommend pursuing further education at a two-year or four-year college. This can significantly enhance their opportunities for career advancement and higher earning potential in the long run.

How much homework can a student expect from this course?

Typically, students can expect at least one assignment per week. However, the majority of their grades are earned through long-term projects that allow them to combine and apply multiple skills. These projects are designed to provide a comprehensive learning experience.

What expenses will I incur? Fees, book rental or purchase, tool costs, etc?

There are no costs associated with this course. All necessary materials are provided, ensuring that participation is accessible to every student.

What is the job market for computer science?

Computer Science is a broad field encompassing many exciting disciplines. The job market for nearly all of these areas is experiencing tremendous growth. Our course specifically focuses on Software Development, particularly Web and App development, and Data Analysis. These are extremely high-demand fields within computer technology, offering excellent career prospects for your student.

What about college credits?

We are pleased to offer eighteen (18) hours of dual credits through Ivy Tech Community College. These valuable credits can be transferred to most four-year colleges within the state of Indiana, providing a fantastic head start for your student's higher education journey.

Do I need to do well in Math and Science to excel in Computer Science?

While strong math and science skills can certainly be beneficial, they are not absolutely required to excel in Computer Science. It is recommended that students have a solid understanding of Algebra 1. More importantly, success in Computer Science hinges on a great attitude, patience, and strong problem-solving skills. If your student possesses these qualities, Computer Science is definitely the right path for them.
