

**Does my student need any previous experience before taking this class?**

We like the students to have biology and chemistry when they apply.

**If my student attends this course, should they go to college or straight to the workforce?**

Most health science programs require some postsecondary education. Some choose to apply for a position during their internship to help them gain more experience.

**How much homework can a student expect from this course?**

First-year students can expect homework in Anatomy & Physiology, Medical Terminology, and Principles of Healthcare. Most homework extends over periods of time, such as projects, presentations, and group work.

**What expenses will I incur?**

Students will have expenses associated with HOSA dues, scrubs, and Leadership Conferences if they choose to participate.

**Are there college credits offered?**

Yes. First-year students can earn 6 college credits at USI. The second year has no college credits at this time.

**How do you pick your students?**

We use a rubric that addresses attendance, discipline, coursework, and GPA. We look at volunteer/community experience, teacher contact, and we may call a student if we have questions.
